### WORK EXPERIENCE

---

#### Front-End Developer

[Kaizen Platform, Inc.](#) / Full-time

February 2021 - Present, San Francisco, CA (Remote)

- Successfully released a new micro-service, which is questionnaires for inside sales, updated and maintained the features as a front-end developer
- Performed refactoring 1000+ lines of code to reusable components to make code maintainable in the future using testing tools such as Jest
- Eliminated 110+ bugs that streamlined customer experiences
- Experienced entire development lifecycle in front-end development, for example creating Design documents from customer demands or discussing API specifications with the back-end team, through building new micro-service
- Worked as part of an 11 member team in a fast-paced company through Agile methodologies using Asana
- Tech used: React hooks, MobX, TypeScript, Jest, Material-UI, Emotion, CircleCI, Docker

#### Front-End Developer

[Vingle, Inc.](#) / Intern

July 2020- October 2020, Vancouver, Canada

- [BASE](#) is an inter-university networking platform for students developed by over 60 students and researchers of diverse backgrounds
- Implemented a feature that mentions another member of a group, that enables users to notify members who have a responsibility to respond
- Made the application layout responsive for mobile users
- Worked alongside a product manager and 5 member front-end team through Agile methodology using Jira
- Tech used: React, Redux, MobX, TypeScript, Firebase

### PROJECT EXPERIENCE

---

#### E-commerce website [moving-sale](#)

- A platform that enables people to sell and/or buy their stuff
- Installed user authentication with JSON web token to avoid session ID verification with database every request.
- Implemented on Next.js and deployed to Vercel with SSG, which reduces critical rendering path in end-users' side

### SUMMARY

---

Front-End developer with 3 years of experience in software development. Able to write scalable and maintainable code that follows principles such as Clean Architecture and React design patterns. Keen to improve website performance.

### SKILLS

---

#### Specialties

React, React hooks, Redux, TypeScript, JavaScript

#### Other skills
